7th October 2022

Star of the Week

Penny

for being really helpful at the end of each day by picking up jumpers and cardigans that people have left in the cloakroom.

Well Done!

Homework

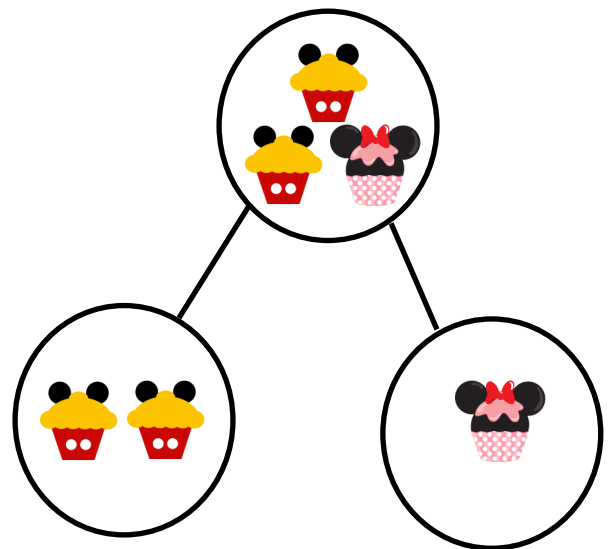

Using toadstools, the children need to explore how they can break the number 8 down into smaller parts.

Following on from our Judaism work in RE, this week's Storytime with Jesus, is all about Moses leading the Israelites to freedom from Egypt.

Maths

This week in Maths we have started to look at part-whole models. These are models that show how a number can be broken down into smaller part

They are especially effective when using pictures that can easily be differentiated, in showing children how larger numbers can be broken, e.g. the 3 cupcakes can be split into 2 Mickey cupcakes and 1 Minnie cupcake:

$$2 + 1 = 3$$

We shall continue exploring these next week.

Trip To Newarke Houses Museum

Next Wednesday (12th October) we shall be going on our History trip to Newarke Houses museum in Leicester.

We shall be leaving school at around 9.30am and we shall be back around 2.45pm.

Whilst at the museum we shall be exploring how life has changed for the people of Leicester throughout History. We shall be paying special attention to the area devoted to toys and how people used play throughout time, but we will also visit a typical Leicester street from the 1950s, explore what life was like for people during World War I and II, and (weather permitting) explore the gardens.

The children need to attend in full school uniform and they MUST have a coat as areas of the museum can be quite chilly at times. Children will be provided with a packed lunch to eat whilst at the museum. They do need to bring their water bottles with them.

If you would like to come and support on this trip please let me know.
