Happy Easter

Well we have reached the end of a very busy Lent Term. The children have worked extremely hard throughout the whole term and I think that they are now ready for the two weeks break. I am not setting any homework as such for the Easter holidays as I want the children to enjoy their break. The only thing that I would ask you to do is keep on reading and practising the sounds in the sound books. The Year 1 Phonics Screening Check happens in June so it would just benefit your children to keep practicing their sounds.

I hope that you have a lovely break with lots of fun times. I shall see you all again on Monday 17th April when school re-opens.

Design & Technology

This week in Design & Technology we explored how wheels and axles work and we created our race cars with working wheels, axles and axle holders. The children worked very hard on exploring how these function together to make vehicles move, and they came up with some super car designs.

Star of the Week

GRACIE

for some lovely
reading with lots of
expression.
Well Done!

Homework

As I mentioned above I want the children to have a good rest over the Easter break ready for the Pentecost Term.

Please just keep on reading and practicing your sounds in your little sound books that you received just before half term.
